

The Total Agribusiness Solution

Phoenix is an Enterprise Resource Planning suite which incorporates both financial and physical modules ensuring correct data is available to the Agribusiness Manager, their Bookkeeper, Consultants and the Accountant. Phoenix is very intuitive, making it easy to use and has a lower training overhead than other financial packages on the market.

Phoenix Live is our **Cloud** offering that has been available to the industry since 2008. The automation of Phoenix Live saves internal processes for the Bookkeeper and Accountant. This includes obtaining data, managing backups and returning data. Having to maintain multiple Phoenix versions to be able to run data is not a problem on Phoenix Live. Bookkeepers no longer need to spend long hours on-site thus reducing travel time and costs.

Phoenix Financials is an easy to use financial recording package allowing you to fully track GST either on a Cash or Accruals basis.

Record reconciled accounts, Customers & Suppliers, Assets & Liabilities, & Physical Accounts such as Livestock & Commodities to produce comprehensive reporting as well as an extensive budgeting system.
